// The problem

Botrytis, Powdery Mildew, and another devastating fungus are infecting over 200 plant species.

Estimated worldwide damage from Botrytis is 40% of crop yields.

Chemical pesticides have limited success against it. Botrytis builds resistance quickly, and these pesticides are unhealthy and damage local ecosystems.

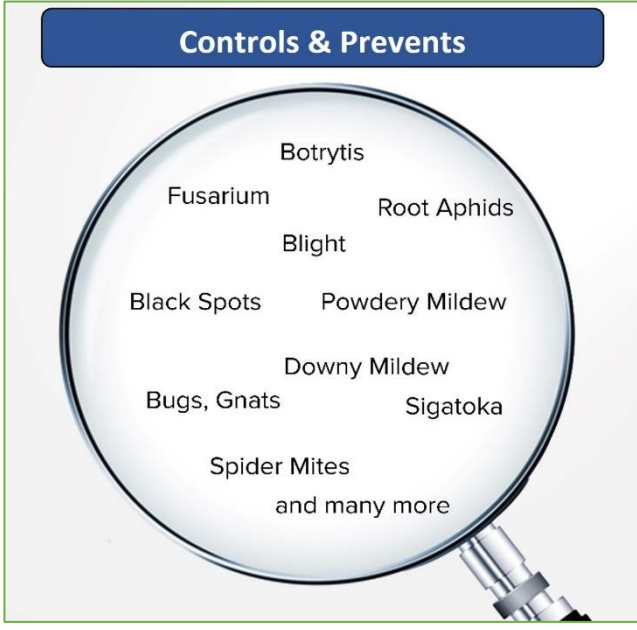

// The solution

We have developed 2-in-1 PROTECTION:

Organic fungicide & Organic insecticide. Our patented approach synergizes non-toxic, plant-based ingredients with a formulation that increases efficacy twentyfold. All the ingredients of BHB are EPA-exempt approved materials.

The product can be sprayed on crops both before and after harvest, has a long shelf life, and is produced in an organically certified factory.

BotanoHealth
Founded : 12/2017
Initial sales:
Israel, USA + Amazon, Spain, Ecuador, Japan and Ethiopia
Factory : The Grasses of Eden Ltd (TGE)
Organic certified ISO 9001 , GMP
Proof of concept:
Tomatoes, Grapes, Bananas, Organic Almonds, Cannabis, Lettuce, Hot Peppers, Roses, Mango, Sweet Potatoes, Dates.....

Easy to use

Step 1
Add to sprayer a dose of 1% -2% of BH-B *

Step 2
Add water and Shake

Step 3
Spray on the plant once or twice a week **

*1.5-3 OZ per gallon of water
**Depending on the infections level

Main Benefits

- 2-in-1 Protection: Organic fungicide, Organic insecticide
- Keeps expensive indoor crops healthy, by biweekly spraying
- OMRI listed for organic use
- Easy to use
- Plant based
- Zero chemical residues
