

# SPECIFICATION SHEET

<b>Dimension</b>	30cm × 100m
<b>Color</b>	Yellow
<b>Material</b>	Polyethylene (PE)
<b>Target</b>	The Whitefly, Aphid, Fruit Flies, Thrips and other pests.
<b>Purpose</b>	Mass-trapping
<b>Recommended Quantity</b>	150 meters per 1000 m <sup>2</sup>

## Application

Sticky traps (roll type) are attached to the structural elements (columns, pillars) of greenhouses and are placed parallel to the rows of cultivated plants. Traps should be placed slightly above the plants. In gardens tapes could be stretched between trees. Also tapes can be wrapped around a tree trunk to protect from insects rising from the ground.
