Crop Type(s)		
These numbers can be approximate:		
Quantity and weight (each) of plants at your facility:		
Lbs. per hour to process:		
Largest diameter material you plan to feed into the machine (root balls, pots, stalks, etc.):		
Other materials you are shredding (Rockwool, Cloth pots, Coco coir, cardboard, grow netting, misc scrap, etc.):		
<small>Caution: shredding metal is not advised.</small>		
Is the plant material wet or dry?	Available power source (3-Phase 480v is ideal):	
Size/placement limitations, if any (LxWxH):		
How will you feed (manual hopper, infeed conveyor, dumper/tipper)?		
What will you discharge into (box, bin, gaylord, drum, dumpster)?	Do you need a conveyor?	
Where will the unit need to operate (indoor, outdoor, mobile)?		

PHOTOS ARE ALWAYS HELPFUL IF AVAILABLE (Facility, material, plants, etc.)
