

NKH320

Removes Ammonia & Nitrates

Breaks Down Organic Solids & Sludge

Reduces Biochemical Oxygen Demand

Removes Available Phosphates

CLARIFY

- ◆ Clarify Bio-Enzyme is used for treatment of agricultural wastewater as well as salt and freshwater bodies such as lakes and ponds.
- ◆ Clarify improves water quality by removing ammonia, nitrates and available phosphates.
- ◆ Clarify rapidly reduces Biochemical Oxygen Demand (BOD) in wastewater ponds, improving dissolve oxygen levels.
- ◆ Clarify rapidly breaks down sludge material in mature wastewater lagoons in crisis, allowing farms to avoid expensive excavation costs.

APPLICATION DIRECTIONS

Mix Clarify directly into water to be treated

DIRECTIONS:

EXPIRATION DATE:

PRODUCT SIZE	TREATMENT VOLUME
1 Liter	25,000 gallons of water treated
1 Gallon	500,000 gallons of water treated
2.5 Gallons	1,250,000 gallons of water treated
15 Gallons	7,500,000 gallons of water treated
