Derived from: boric acid, manganese EDTA, zinc EDTA
Also contains non-plant food ingredient: carbon

WARNING: This fertilizer contains boron. Its use on any crops or under conditions other than those recommended may result in serious injury to the crops.

PRODUCT INFORMATION: MicroCarb contains carbon substances from vegetable origins that increase soil cation exchange capacity, improving nutrient availability. MicroCarb also contains natural plant extracts which promote root development, as well as the growth and fruiting capability of plants. MicroCarb should be used prior to fruit set for maximum agronomic benefit.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual/institution. Do not allow to freeze. MicroCarb is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit AndersonsPlantNutrient.com/Tank-Mix.

Soil Application: Apply in-furrow, 2x2, or at sidedress or topdress. Use caution when applying on the seed in saline, alkali, or coarse textured soils.

Foliar Application: Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.

	Application	Use Rate (per acre)	Timing
Field & row crops; vegetables	Soil	1-2 quarts	With starter (in furrow or 2x2)
	Foliar	1-2 pints	Post emergence
Turf	Foliar	1-2 quarts (0.75-1.5 ounces/1000 ft ²)	Every 7-14 days or to correct nutrient deficiencies
