

Descriptions - specifications

FERTICELL Pro K 0-0-20 is an ecological fertilizer concentrated in potassium, indicated for the prevention and correction of potassium deficiencies, and allows optimum ripening, color and fruit size. It is a fertilizer that is Free of Chlorides.

FFERTICELL Pro K 0-0-20 can be applied both foliar and/or irrigation in all kind of crops during any stage of the vegetative cycle.

FFERTICELL Pro K 0-0-20, provides potassium of easy foliar and root assimilation.

- Prevents and corrects potassium deficiency disorders. - Improves fruit set and fattening of crops by optimizing the metabolism of plants.

- Allows an adequate balance between breathing and perspiration, increasing resistance to stress due to lack of water.

- Better regulation of osmotic pressure and cell turgor, regulating water and photosynthetic metabolism.

FERTICELL Pro K 0-0-20 increases the resistance of plants in unfavourable weather conditions, and must be used especially during the fructification phase.

GUARANTEED ANALYSIS

Composition	Percentage (w/w)	Percentage (w/v)
Total Oxide potassium (K2O)	20%	26%
Total potassium (K)	16%	21%

PHYSICAL PROPERTIES

State:	Liquid 100% soluble
Color:	Dark-brown
Density:	10.93 lbs / gallon @ 68 degrees F
pH:	> 13.5

GENERAL USAGE AND DOSAGE RECOMMENDATIONS

Crop	Foliar Dose	Soil Dose
Fruit trees (Citrus fruits, Apples, Pears, Blueberries, Almonds, Cherries, Peaches, Avocado, etc)	1-4 quarts / acre	1-4 quarts / acre
Horticultural crops: (Tomato, Potato, Cucumber, Melon Courgette, Cauliflower, Onion, Carrot, Pepper, etc)	1-4 quarts / acre	1-4 quarts / acre
Extensive crops: (Cereals, Alfalfa, Cotton, Beetroot, Corn, Sunflower, etc)	1-4 quarts / acre	1-4 quarts / acre

• The specified dosages are general recommendations.

The amounts depend on the crop, phenological state, level of deficiency and soil type.

• The physical and appearance characteristics of the product may be altered due to the ecological nature of the product.

• Use under technical advice. Keep the product at room temperature.

Important notes:

1. Due to its high pH, the product must be prediluted before being poured into the irrigation tank or spray. Add acidifier.
2. In fertigation applications, divide input being a maximum: 1.65 gal/acre, at intervals of 10-15 days.
3. agitate the container vigorously before use.
4. It is compatible with the majority of phytosanitary products and fertilizers and with the majority of herbicides. Except those of alkaline reaction or mineral oils.

However, the following precautions are recommended:

- Do not mix with highly alkaline products.

- Do not mix with products that contain phosphorus and / or calcium.
